Our Integrated System Includes:

- *Architectural Grade Materials*
- *High Tech LED, Low Voltage Technology*
- *Attractive, Durable Products*
- *A Price Point That Is Reasonable, Affordable And Blows Our Competition Away.*

LED Bulbs— We use only pre-tested LED bulbs. They are manufactured using CREE components (The best) which are manufactured by CREE Corp. in Durham, NC.

Durability— All spots are tested and have an IP rating which predicts the fixture's ability to withstand water seepage into the casing. Our spots have the highest rating (IP67) except for those that are designed to be fully submerged in water.

Accessories—Wire and wire connectors are US manufactured. They both meet the highest quality standards including a UL Listing.

Economy— LED means long life bulbs that consume about 8% of the energy of older tungsten bulbs and have increased performance including an anticipated lifespan of 40,000 hrs. Electric cost for package is approximately \$40 per year.

The Intro Package is \$1,199*. This is 30% to 50% below competitors and includes:

- 300 watt, 12 volt stainless steel transformer with four taps, dusk to dawn sensor and 1 to 9 hour burn timer. UL Certified. We use 12/2 copper direct bury wire and DryConn connectors.
- 8 Spots with 4 watt CREE LED bulbs designed and built to replicate true tungsten color.
- 2 Solid brass LED path lights
- Complete installation, including 1 line under sidewalk.
- Comprehensive warranty. We employ a licensed electrician and maintain all required insurances.
- Other products and upgrades available with similar competitive savings

*Prices subject to change without notice
